Claremore, OK 74017

July 1, 2011

Mr. Starkey,

On behalf of Northeastern Oklahoma's multifamily housing advocate, the Tulsa Apartment Association, I am pleased to inform you that we endorse your efforts to make the dry tablet form of pseudoephedrine available by prescription only, leaving the liquid form available over-the-counter.

As property owners, landlords and citizens of Northeastern Oklahoma we feel compelled to do our part and take action to prevent the devastation that methamphetamine labs are having on our area. The individuals who choose to cook meth are not only putting themselves at risk, but they are also risking the health and safety of children living in the home, their neighbors, our employees, the first responders (police, firemen and EMTs), and countless others who may inadvertently come in contact with the meth lab.

Thank you Mr. Starkey for taking up this cause and fighting to make our city, and all of Northeastern Oklahoma, free of dangerous meth labs.

Our endorsement carries with it our permission for you to use our Association's name, should you wish.

Sincerely,

Keri Cooper
Executive Director
Tulsa Apartment Association
On Behalf of the Tulsa Apartment Association Board of Directors
